

Study the following.

Any fraction with the same numerator and denominator is equal to one.

Examples: $5/5 = 1$ because $5 \div 5 = 1$

$\frac{12}{12} = 1$ because $12 \div 12 = 1$

Remember the \div symbol and the $/$ symbol mean “divided by”.

Examples of pictures showing $2/2 = 1$:

Write the answers.

- | | | |
|--------------------|------------------------|------------------------|
| 1. $4/4 =$ | 2. $21/21 =$ | 3. $342/342 =$ |
| 4. $\frac{6}{6} =$ | 5. $\frac{123}{123} =$ | 6. $\frac{956}{956} =$ |

Write 5 examples of fractions that equal 1.

Draw 3 picture examples of fractions that equal 1.
